Dev Bootcamp
(2015)

Louisiana State University
Bachelor's Degree in Spanish
(2003-2007)

About Me

A former teacher and freelancer in the film industry, I've come to find zen in programming. It's the perfect synthesis of art and logic. I'd say I'm a creative driven web developer looking to bridge cultures, entertain people, and build things that teach. And in order to do that, I'm constantly driving myself to learn new technologies.

Experience

Dev Bootcamp   San Francisco, CA
Graduate   August 2015 – December 2015

• Focused on Full Stack Web Development
• Designed applications using MVC architecture, RESTful routing, & OO Design
• Refactored multiple code bases through group code switches
• Team building through group projects and Engineering Empathy sessions
• Behavior Driven Development (Capybara, Selenium)
• Practiced Agile Web Development (pair programming, timeboxing, user stories)
• Utilized Test Driven Development (RSpec, Jasmine)
• Developed proper Git work-flow practices

Freelancer (Film Industry)   Various Locations
From Set P.A. to Researcher   January 2008 - May 2015

P.A.
• Admin skills (create daily schedules, organizing paperwork)
• Running a base camp and predicting set calls for actors
• Public Speaking
• Management / Micromanagement

Producer
• Coordinated travel for cross-country road trip
• Create schedules for meet ups, interviews, and filming
• Helped to fundraise $250,000 on Indiegogo for feature film project
• Media Marketing
• Website Management

Researcher / Writer
• Cold called places to organize interviews and seek experts
• Created interview questions
• Read and dissected scientific and industry-specific material
• Wrote, revised, proofread scripts

CEIP Sant Jeroni   Sant Pere de Riudebitlles, Spain
ESL & American Culture Teacher   August 2009 - May 2010

Taught English grammar, writing, reading, speaking, and listening skills. Created lesson plans, presentations, tests, and exercises. Lectured in English and Spanish.

Projects

▶ **Appathy:** A Google Chrome extension created for a hackathon. Allows Reddit commenters to upload sarcastic ASCII art along with their commentary. Built on Javascript.

▶ **Legislative:** Co-created web app which uses government data in real-time to provide easily digestible visualizations of bills hitting the congressional floor. Uses Express, MongoDB, HighCharts, Javascript, & OpenGov API
